

JAVIER JARAMILLO

New York, NY | 347.239.9026 | jjaramillo34@gmail.com | LinkedIn - Javier Jaramillo | GitHub

Professional Summary

Dynamic and innovative Data Analyst and Full Stack Developer known for optimizing operational workflows through strategic integration of Streamlit with Twilio API, enhancing communication channels and efficiency. Expert in leveraging Tableau, Power BI, and Qlik for insightful data visualization that drives informed decision-making and enhances data accuracy. Skilled in crafting compelling portfolio websites using React.js and [Sanity.io](#), aimed at maximizing user engagement and accessibility. Proven ability to automate complex ETL processes using Python, NumPy, and Pandas, ensuring meticulous data management and maintaining high QA standards for software releases.

Core Competencies

Data Visualization & Analysis: Tableau | Qlik | Excel | Microsoft Power BI.

Programming & Scripting: Python | Microsoft Visual Basic (VBA) | Streamlit | Tesseract | BeautifulSoup | NumPy | Pandas | Selenium | OpenCV | Django | Flask.

Database Management: SQL | MySQL Server | Oracle | DB2.

Operating Systems: Windows 7 & 10 | macOS.

Development & Collaboration Tools: Docker | Git | Visual Studio Code | Cursor.

Core Competencies: Data Collection | Process Improvement | Quality Assurance (QA) | Strategic Planning | Research & Data Analysis | Software Testing | Data Automation | Technical Support | Extract, Transform, Load (ETL) Processes | Artificial Intelligence (AI) & Machine Learning Concepts.

Software: Microsoft Excel | Microsoft Word | Microsoft PowerPoint | Visual Studio Code | Cursor | Docker | Git Studio | Tableau Desktop | Microsoft Power BI.

Professional Experience

District 79 NYC Public Schools – New York, NY

2022 – Present

Data Systems Coordinator & Full Stack Developer/Engineer

- Administer and maintain core data systems and educational applications across programs such as Pathways to Graduation (P2G) and AdultEd, ensuring data integrity, performance, and accessibility.
- Lead the development and deployment of internal web applications for District 79, including tools for School Consolidated Plan, QEP Assessment Management, and Crawls Registration workflows.
- Manage and enhance the Power Apps-based P2G Intake Application, streamlining student onboarding and tracking processes across multiple district programs.
- Collaborate with cross-functional teams to design and implement integrated data solutions, optimizing workflows between PowerApps, Dataverse, and legacy systems.
- Contribute to the Adult Education intake modernization project, developing multi-application systems that unify enrollment, assessment, and reporting processes across the division.

Multiple Companies (Contracts) – New York, NY

2022 – Present

Data Analyst & Full Stack Developer

- Heightened communication channels and operational efficiency by integrating Streamlit applications with Twilio API.
- Enhanced data visualization using Tableau, Power BI, and Qlik, increasing data accuracy and actionable insights.
- Enriched user engagement and content accessibility by engineering portfolio website using React.js and Sanity.io.
- Slashed manual workload and advanced data accuracy through ETL optimizations by automating data management processes.
- Minimized processing time and boosted data manipulation capabilities by using Python scripts utilizing NumPy and Pandas.

Agilent Technologies – New York, NY

2020 – 2022

AI Model Data Specialist

- Reduced research time by two weeks by using "Golden Tag Set," standardizing product test specifications.
- Decreased two-hour weekly equipment research time by automating Excel templates with VBA and Python scripts, streamlining data comparison and dashboard updates.
- Refined asset management efficiency by optimizing AI for connected assets, analyzing instrument log files with stakeholders.
- Elevated asset management efficiency by monitoring asset for tagging processes and reduce operational overhead.
- Adjusted client data parsing and XML scraping processes with Python scripts, implementing model maintenance scheduling for consistent performance and reliability.

Junior Data Engineer/Analyst Consultant

- Processed 6,000+ to 10,000+ raw data points daily on medical professionals, simplified data operations through scripting, web scraping, API integration, PDF parsing, and image analysis.
- Cut data processing time by three weeks, optimizing workflow efficiency and accuracy through data parsing and extraction.
- Accelerated project completion by six months, intensifying 400% interest for recruiting events through close collaboration.
- Safeguarded data integrity and reliability by tailoring Python scripts using BeautifulSoup, Selenium, and Requests to automate data gathering and upload processes into PostgreSQL databases.
- Exceeded data analysis capabilities and extracted valuable insights from textual datasets with SpaCy and NLTK for NLP.

Cityrealty.com – New York, NY**2012 – 2019****Research Analyst | Data Analyst**

- Bolstered processing speed by 20x using VBA to input real estate data into CMS, streamlining ETL pipeline.
- Boosted organizational objectives and office efficiency by reducing manual data entry by 80% through automation of data collection and analysis using Python, VBA, and SQL.
- Analyzed over 1 million data points and historical data using Excel pivot tables, VBA, and graphs, and creating detailed weekly, monthly, and quarterly reports.
- Revitalized organizational objectives by developing new tools on weekly and monthly basis, leveraging Python, VBA, and SQL.
- Supported efficient operations and minimized disruptions for a team of 50 by offering IT support for office functionality.

Additional Experience

Security Identity Access Management Help Desk Team Lead – NYC Department of Education (DOE)

- Accelerated new hire integration with training sessions, reducing onboarding time and ensuring adherence to DOE policies.
- Improved HR process efficiency by developing and optimizing the HRConnect tool using Java and DB2 technologies.
- Optimized incident management processes and reduced average resolution time by prioritizing ServiceNow ticket queues based on SLA adherence and IT Service Management (ITSM) practices.
- Directed technical support specialists to achieve a 92.8% user satisfaction rating for Help Desk Operations management.
- Achieved 94.3% adherence to industry standards, regulatory requirements, and Cybersecurity best practices by conducting monthly security audits, risk assessments, and compliance reviews.

Project Management

Tech Projects Portfolio

- Garnered over 500 unique visitors monthly by developing interactive developer portfolio using React.js and Node.js.
- Strengthened portfolio accessibility and user engagement by integrating Sanity.io for content management, enabling streamlined content updates and interactive project showcases.

SMS Notifications – Mech-Tech Colleague

- Reduced communication response times by enacting SMS Notification system using Python Streamlit, MongoDB, and Twilio API, enriching user communication efficiency.
- Accommodated increase in user traffic without performance degradation by deploying the SMS Notification application on AWS LightSail, gaining high availability and scalability.

Power Solar PR Project

- Improved solar power management across Puerto Rico by developing Power Solar PR, integrating React and Mapbox.
- Progressed operational efficiency and performance tracking in solar power installations by enabling geographical analysis.

Education & Certifications

- Bachelor of Science | Queens Community College – New York, NY
- Computer Associate (Software) | DCAS | 2022
- Backend, SQL, and DevOps with Python Bootcamp | 2022
- Python & Django | 2022
- Computer Programmer Analyst | DCAS | 2020
- Data Analysis with Excel & Tableau
